

Md Hammad Ullah Fayed

Software Engineer — Full-stack web apps · Business systems · Automation

Builds and runs production software end to end — from database schema to deployed server. Shipped a corporate website and an internal inventory platform as sole engineer, plus operations systems used daily across a manufacturing group. Came up through Excel → SQL → Power BI → Python → full-stack, so every project starts from how the business actually works.

FRONTEND

Next.js · React · Vite
HTML · CSS · JavaScript

BACKEND & DATA

Node.js · Python
SQL · Firebase
Pandas · openpyxl

INFRA

Linux VPS · PM2 · Git
Vercel · Streamlit Cloud

AUTOMATION & AI

Playwright · WeasyPrint
Power BI · Excel
Whisper · Ollama

EDUCATION

BSc in Computer Science & Engineering
Presidency University — final year

LANGUAGES

Bangla (native) · English

EXPERIENCE

HB Jamil Group of Industries

Dhaka · Present

- **GLTC corporate website (gltcbd.com)** — designed, built and deployed the public website for Global Leaf Tobacco Co. Ltd and its sister concerns, solo, on the company's own domain.
  `Next.js · React · production deploy`
- **GLTC inventory management system** — sole full-stack engineer on the company's internal stock platform: REST API, database and web client, self-hosted with git-based deploys.
  `Node.js · React · Vite · Linux VPS · PM2`
- **HBTrace / HBTrail** — GPS check-in tracking for 245+ field officers across 10 divisions and a 12-tier hierarchy, with append-only audit trails and Bengali PDF reporting.
  `Python · Streamlit · WeasyPrint`
- **GP tracker automation** — folder-watch service that validates tracking exports and generates daily reports unattended; reporting time cut from ~3 hours to under a minute.
  `Python · Pandas · Windows service`
- **Factory production log app** — digitized handwritten production logs into one validated, standardized dataset.
  `Python · Streamlit · openpyxl`
- Consolidated 8 disconnected regional files into one master data source; built Playwright automation for bulk portal updates.

SELECTED PERSONAL PROJECTS

F.I.D.O. — local voice AI assistant

- Jarvis-style desktop assistant: Whisper speech-to-text, local Llama via Ollama, neural TTS, WebSocket orb UI and app control.

Mess Hisab — realtime expense tracker

- Single-page Firebase/Firestore app used daily by an 11-person household.
